Hosted PBX

Minnesota Telephone Networks has the expertise to serve as your Virtual IT Department. We provide business owners [technology support such as network management, desktop and server support, security](#) and much more for a fraction of the costs of an in-house IT Department.

Because we understand that controlling costs is critical to profitable business operations, we have tailored our services as fixed-fee deliverables, allowing you to forecast and budget for your technology maintenance needs on a monthly basis, with [no unexpected expenses](#).

You run a business - and we help your business run.

To better serve you and make your business run even more smoothly, our company offers [Managed Telephony solutions](#).

Are you considering a new phone system?

We would like to share the benefits of our service with you, and introduce you to features such as [Unified Messaging](#) - where all of your voice mails can be forwarded to your e-mail account as voice attachments for the ability to retrieve and forward messages to and from anywhere, or to anyone. Or [Find Me, Follow Me](#), where your calls can ring at your office, then your cell phone, then your home office or hotel room while traveling - always maintaining the appearance that you are available to your clients.

One of our clients' favorite features is the ability to [record phone calls](#) and conferences then email them afterwards to individuals that could not attend. We can also configure your laptops or PC's for the ability to place and receive calls directly from your Internet-connected device, anywhere in the world - imagine the ability to receive a call on your laptop that was dialed to your office extension - or saving on costly hotel phone bills!

More Benefits to integrating a Managed Telephony solution in your company ...

- No large up-front investment
- Unparalleled productivity gains
- Inexpensive to implement
- Reduce support costs
- Disaster Proof - all lines can be forwarded, anytime

Let [Minnesota Telephone Networks](#) manage your PBX, allowing you to manage your business!
